### Point of Sale & Invoicing

- Fully integrated with General Ledger, AR, & Inventory Control modules.
- Quick look-up for inventory items, customer accounts, customer orders, customer account balances and purchase history.
- Create and print a quote without affecting inventory, customer accounts or cash balances.
- Unlimited description lines may be typed for each item.
- Open Sales may be saved and added to at a later time.
- Add customers and inventory "on the fly" directly from the sales screen.
- Can be used to track repair orders and layaways.
- Accepts and tracks deposits, paid-on-accounts, refunds and returns, credit memos and paid outs.
- Bad check list allows collection at next sale.
- Up to 15 pre-set tendering types, including food stamps.
- Invoices are aged automatically and you have the option of charging interest or "late charge" on over-due invoices.
- Can require authorized operators to login before making sales.
- Discount line item by percentage or dollar amount.
- Discount entire sale by percentage.
- Pop-up windows for user information and help screens.
- Taxing by line item or order – up to five different taxing authorities. Five taxes with detail per invoice.
- Handles Canadian taxes.
- Allows search of inventory by item code, category, class or

vendor.

- Allows MSRP to be shown on the invoice.
- Allows blind checkout.
- Commission/splits by individual sale or by line items.
- Handles unlimited salespersons. Tracks quotes, sales, cost of goods, net sales, GPM, commissions paid and commissions as percent of sale for each salesperson by month and YTD.
- Calculates commissions on gross sales or net sales.
- Handles up to 3 commission rates per salesperson.

#### REPORTS

- "X" report - list of transactions
- "Z" report and daily reset report
- Transaction history for previous sales periods
- Consignment sales report by vendor
- Authorized operators list
- Shift group report
- Open sales report
- Price quotes
- Special orders & Layaways

#### • Quick Sales Screen

- Quick sale module is designed for use in predominately cash sale installations. (E.g. convenience store, grocery, etc.)
- Quick Sale uses a single field entry for all functions. When used with scanner, a typical sale can be completed with only one or two keystrokes.
- Requires the least amount of training for Clerks and operators.
- On-screen receipt with optional printing.
- Allows split tendering.

#### Security

- Security levels range from 00 (zero) to 99, with 99 being the highest possible security level.
- Each operator can be assigned to an individual menu option or to entire menus to restrict access to specific users of the systems.
- Passwords can also be assigned to each menu option.
- Allows for customization of each operators menu options.

#### Inventory Control

- Fully integrated with General Ledger, Accounts Payable and Receivable, Sales Order entry, Purchase Order entry, and Counter Sales.
- Maintains sales, costs of goods and inventory ledgers.
- Provides user definable categories, classes and locations. It is possible to graph units sold monthly and also see a detail of gross, and net sales.
- Items can be set-up as kits, explosions, implosions, recipes, follow-on, or choice.
- A list of modifiers to inventory items pops up at the point of sale.
- Multiple pricing levels available on user-definable tables – up to 10 levels of pricing.
- Item descriptions can be up to 4 (four) lines long.
- Detailed serial # and tracking.
- Up to 20 characters alphanumeric code for part numbers.
- Search by item code, product description and separate 20- character alphanumeric manufacturers part code.

- Search reorder level and reorder amount.
- Unique price matrix allows 9x999 user-defined quantity level pricing percentage discounts or mark-up levels (selling prices) for each item. Items can also be priced by 9 levels of fixed-pricing per item.
- Handles package pricing.
- Handles regular, non-inventory, serial number, percent and rental items.
- Handles current vendor plus 5 alternate vendors and cost interface to purchase orders.
- Three character alphanumeric unit of measure – and buy/sell unit to purchase orders.
- Five-character category code and five-character class code inventory breakdown with category class
- look-ups.
- Maintains separate inventories for different product type or multiple stores (sales and warehouse locations).
- Tracks last sales date, receipt date and usual vendor plus item costs.
- Allows batch price updating.
- Tracks both reorder level and reorder amount, plus outstanding purchase orders and outstanding back orders.
- Calculates amount on hand and on reserve. Calculates average cost per item.
- Calculate gross sales, net sales, and quantity YTD for each item.
- Maintains and calculates taxes owing on up to 1296 taxing authorities.
- One hundred character general comment or additional description per item, which optionally prints on sales invoices.
- There is an online help system and pop-up calculator.

#### Accounts Receivable

- Fully integrated with General Ledger and Counter Sales.
- Allows special customer or contract pricing per item.
- Provides for the creation and maintenance of customer records.
- Counter Sale invoices are transferred to customer invoice files in AR and can be created and maintained through this module.
- Can create and maintain AR invoices through this module.
- Provides for the recording of customer payments, printing of customer statements, and invoices.
- Will track activity by salesperson.
- 20 lines of user-defined customer information can be used for things such as billing periods, list of persons who are authorized to charge purchases, credit limits, birthdays or anniversaries, etc.
- Maintain custom message for each customer that pops up in the sales screen (flag).
- Allows customer purchase history lookups.
- Shows MTD and YTD purchases.
- Maintain multiple contacts per record.
- Shows open invoices and totals.
- Produces "mail-merge" file used by word processor for personalized form letters.
- Multiple ship-to addresses are allowed for each customer.
- Age invoices by customer totals or by open invoices.
- Prints aging reports by current, 30 day, 60 day, 90 day and average.
- Allows interest to be charged on overdue invoices.
- Receivables can be disbursed to up to 5 General Ledger Ac-

counts. Pop-up menu allows for viewing accounts and their numbers.

## Purchase Orders

- Purchase orders are tied directly to Accounts Payable and Inventory Control modules.
- Allows items to be "drop-shipped" to customers PO's.
- Create automatic PO's based on inventory reorder level.
- Print barcode labels during the purchase order process.
- The system allows for the purchase of non-stock items (office supplies, shop materials).
- It is possible to receive all items on a purchase order with one keystroke.
- Works with pdt terminal for receiving.

## Time Cards

- Time cards feature can be used to track employee payroll hours on a user-defined basis.
- A password is used to maintain the integrity of each employee account.
- The records created produce a payroll period time card report.

## Repair Orders

- Includes all counter sales features.
- Designed for a wide variety of repair shops.
- Features user-defined input screen terminology.
- User definable header fields.
- Create bids, estimates, and quotes.
- Unlimited number of mechanic labor rates.
- Roll-in and rollout sales.
- Discounts line item, by percentage or dollar amount.
- Maintains detailed customer and inventory sales history.
- Quick look-up windows for:
  - Customers
  - Customer work orders
  - Inventory information
  - Customer account balances
  - Special Orders
  - Categorizes and subtotals line items into user-defined Repair Order subtotal groups.:
    - Parts
    - Outside labor
    - Accessories
    - Miscellaneous
    - Serial Numbers
