INTEGRATING IC-VERIFY WITH POWER POS

Each computer that will clear credit cards.
>   Add the following to the computer's AUTOEXEC.BAT file:
>   >   SET ICPATH=<Path> … The path MUST end with a "\"; e.g. "C:\POWER\
>   SET ICTERM=### … Each computer MUST have a Unique 3 digit number.
>   >   SET ICTO=90 … This sets the response timeout to 90 seconds (Optimal).
>   >   Restart the computer.

Identify one computer, on the network, with a modem, to process the ICVERIFY transactions.
>   Modify the CONFIG.SYS file as follows:
>   >   Device=c:\dos\himem.sys
>   >   Device=c:\dos\emm386.exe ram 1024

>   If operating in DOS:
>   >   Go to the Power Directory Prompt.
>   >   Copy the PS.BAT file to PSIC.BAT
>   >   Edit the PSIC.BAT file and add the following 3 lines at the top of the file:
>   >   >   Btrieve /p:4096 /m:64 /f:64
>   >   >   X:\icverify\icmulti … ("X:\icverify" represents the path to IC Verify)
>   >   >   X:\icverify\icverify /M <Path> <Path> /O … Where the <Path> is the same as the
>   >   >   >   SET ICPATH variable above.
>   >   Execute the PSIC.BAT file on this computer only to start the POWER POS program.
>   >   Restart the computer.

>   If operating in Windows 95:
>   >   Go to "Start, Programs, MS-DOS Prompt".
>   >   Change to the ICVERIFY Prompt.
>   >   Edit ICGO.BAT, a new file, as follows:
>   >   >   X:\icverify\icmulti … ("X:\icverify" represents the path to IC Verify)
>   >   >   X:\icverify\icverify /M <Path> /O /N … Where the <Path> is the same as the SET
>   >   >   >   ICPATH variable above.

>   >   Close the DOS Window.
>   >   Right Click on the "Start" button and select "Explore"
>   >   Navigate to the "Windows, Start Menu, Programs, Startup" folder, and Right Click in the
>   >   >   Right window and select "New, Shortcut". Type in "X:\icverify\icgo.bat" at the
>   >   >   Command Line Prompt then Click "Next", Type "ICGO" as a Name, then Click
>   >   >   "Next", select an Icon, then Click "Finish".
>   >   Right Click on the "ICGO" icon and select "Properties". Click on the Program Tab, then
>   >   >   select "Minimized" at the RUN option. Click on the Memory Tab, then Checkmark
>   >   >   "Protected", then select 1024 at the INITIAL ENVIRONMENT option, then select
>   >   >   1024 at the EXPANDED (EMS) MEMORY option, then select 1024 at the MS-DOS
>   >   >   PROTECTED MODE (DPMI) MEMORY, then click "Apply", "OK".
>   >   Close the "Explore" window.
>   >   Restart the computer.

Start Power POS and go to "Sales Maintenance, Maintain Station", use the <F2> key and select each sales station that will be clearing credit cards, hit <ALT-T>, go to each of the Credit Card tendering lines and enter a "C" in the "C".
