Serial Printers Set-up

Setting up a Local Serial Printer in Windows 95/98

16. Physically attach the printer to the **COM** port on the PC, making note as to which port you are attaching to.

Note: In General most serial printers will work with a null mode cable. If not, refer to the printer manual for specific pinouts for your printer's cabling needs.

2. Go to START, RUN.

- 3. Type in SYSEDIT. Click OK.
- 4. The SYSTEM CONFIGURATION EDITOR window will open.

Go to the **AUTOEXEC.BAT** window, and type in the following statements:

MODE COM?,96,N,8,1, MODE LPT2:=COM?: then press **<ENTER>**. (Where the **?** represents the COM port number your printer is attached)

- 5. Go to FILE, and EXIT. When prompted to save changes, click on YES.
- 6. You will need to **RESTART** the computer for these changes to take affect.

After restarting the computer: Go to **START, SETTINGS,** and **PRINTERS.** 7.

Double left click on the **ADD PRINTER** icon. 8.

9. Click on NEXT.

10. Select LOCAL PRINTER. Click on NEXT.

Setting up a Networked Serial Printer in Windows 95/98

After the network has been configured and the printer has been physically attached to the PC within the network, the printer needs to be shared before it can be recon\gnized within the network. The following steps are needed to share the printer on the network.

1. Go to **START, SETTINGS**, and **PRINTERS**.

- 2. Right click on the printer you wish to share.
- 3. Select SHARING.
- 4. Select the SHARE AS button.
- 5. Type in the name of the printer (i.e. RECEIPT)

Click **APPLY**.

Click OK.

The printer is now able to be seen on the network.

On *each* individual POS station, the shared printer needs to be added. Add the printer as follows:

1. Go to START, SETTINGS, and PRINTERS.

 Ageshared Shared As
